Trisled's best-kept secret is finally here! Practical, affordable and durable — RotoVelo will make you go faster, be seen and stay dry.

Our latest velomobile builds on Trisled's philosophy of 'simplicity equals usability', with all the sleek curves and Trisled speed tweaks thrown in. Improve your commute, pick up your shopping, tour the country, or just take it for a spin.

With a light system, hatch, mirror and built-in luggage space, RotoVelo is ready to ride!

This revolutionary new design features the world's first roto-moulded fairing, making it more durable than any other velomobile on the market.

You can leave it on the street, park it outside and take it anywhere you want... without having to worry about scratching the paint.

BUILT WITH PASSION:

Each RotoVelo is individually manufactured and assembled at our factory on the Mornington Peninsula. RotoVelo features an Australian-made roto-moulded fairing in eight eye-catching colours. Weighing approximately 33 kilograms, RotoVelo offers durability and performance.
