#### IMPORTANT INFORMATION:

All Trisled racing vehicles are built at our factory on the Mornington Peninsula by people who race HPV's. New models are tested by our racing team for 6-12, months before we release them to ensure reliability, durability and performance. Tomahawk is a racing HPV and is not suitable for road use. Scrutineering requirements for this vehicle differ between races and are subject to change. While Trisled makes every effort to ensure that our racing models are compliant with Australian HPV racing regulations, we cannot guarantee that our machines will meet scrutineering requirements. "Trisled" is a registered Trademark in Australia owned by Ben's Big Ideas Pty Ltd. © 2016 Ben's Big Ideas Pty Ltd trading as Trisled. All rights reserved.

The Tomahawk is our first 'head in' pre-cut corflute racing HPV. It features a combination of low weight, great aerodynamics and a low centre of gravity, making it one very competitive package!

The Tomahawk is delivered as a complete rideable chassis, with a coreflute fairing kit supplied in flat pack form, including glue, tape and instruction video. Fairing kits can be bought separately for easy replacement when your old one needs to be retired.

A great way to get the team involved in building your own racing vehicle!
